Professional Opportunity

Software Assurance Engineer

Job Description

Alphaport, Inc. has an opening for a Software Assurance Engineer onsite at a NASA client facility in Cape Canaveral, FL. This full-time position supports software safety and assurance in accordance with the Program or Project software assurance plan covering the entire software lifecycle.

–

Key Responsibilities

- Provide technical software safety and assurance support including development and review of software safety and assurance documentation; analysis, review, and consultation of technical issues; and participation in Software Assurance and Classification Assessments (SACA).
- Perform software safety analyses as defined in requirements.

Education and Work Experience

- Minimum BS degree in Engineering or Science
  - Eight years of directly related experience may be substituted for a BS degree

Physical Requirements

Kneel, crouch, and manipulate (lift, carry, move) light to medium weights of 10 to 20 pounds. Requires good hand-eye coordination, arm, hand and finger dexterity, including ability to grasp, and visual acuity to use a keyboard, operate office equipment, and read information on spreadsheets and reports. The candidate frequently is required to sit, reach with hands and arms, talk, and hear.

Alphaport, Inc. is an equal opportunity employer. Qualified applicants will be considered without regard to age, race, creed, color, national origin, ancestry, marital status, affectional or sexual orientation, gender identity or expression, disability, nationality, sex, or veteran status.

Due to contract requirements, U.S. citizenship is required to obtain access to government facilities and systems.

Local candidates only (Cape Canaveral, FL area). No relocation.
